

Apple iPhone/Touch Integration: How To

PlanSwift now has the ability to send plans directly to your Apple iPhone/Touch. To set up your Apple iPhone/Touch with PlanSwift. Follow these simple directions: (Please Note, PlanSwift sends files to you iPhone through your wireless internet connection... If you are unsure of the type of internet connection you have please contact you network administrator.

Synchronization of your plan is not limited to the use of the Discover app. Other apps using the WebDav URL can also work with PlanSwift. Set up is similar you just need to use the WebDav URL that the application gives you and enter it into the Settings in PlanSwift.

Tested Apps:

Discover - **Free**

Files Lite - **Free**

Air Sharing - **minimum cost**

1. Download and Install the FREE Discover App from iTunes. For a direct link to the Application click [Here](#). (NOTE: In order to download Applications from the Itunes store you must have an iTunes account. Click [here](#) for setting up an iTunes account.)
2. Connect your iPhone to a wireless network connection. If you are unsure of how to do this refer to you iPhone user manual.
3. On your iPhone/Touch, Click the Discovery application. A window will appear stating Discover would like to connect to your network connection. Press Connect.
4. Holding you iPhone/Touch Upright, Press on the green Circle located on the bottom left hand side of the screen. The Hint window should appear.
5. Open Internet Explorer, Type The URL Exactly as it appears on your Hint Screen on you IPod/Touch.
6. Click on "Add Directory" Located on the upper Left hand side of your Screen.
7. In the Directory Name dialog box type "PlanSwift"
8. Click on OK
9. Open PlanSwift. Click on The Settings Tab on the Ribbon. Next click on the settings Icon.
10. Click on File Paths in the pane on the left side of the Settings window
11. Click on the Text box named "iPhone/iPod Sync Path:" Type in the URL Exactly as it appears on your Hint Screen on you iPhone/Touch, followed by "/PlanSwift"
12. Close the hint screen on you iPhone/Touch
13. In PlanSwift, Click the home tab located in the Ribbon. Click on "Download To iPhone/iPod Button.
14. Select The Images you wish to download.
15. Click Sync

You should now see the images appear on your iPhone/ Touch. Pressing on any of the images on the iphone will open them up in the viewer allowing you to see the full uncompressed plan.

version 8.5 and later
